

NEGATE[®] 37WG

Herbicide

QUALI-PRO

Quality Turf & Ornamental Products

Unique dual powered post-emergent Sulfonylurea herbicide for grass and broadleaf weed control in established warm season turfgrass. Sulfonylurea herbicides are effective at rates 1-5% of other herbicides. Controls Ryegrass, *Poa annua* and other cool season grasses as well as other tough-to-control Broadleaf weeds such as Clover, Dandelion, Henbit and many others.

- Synergistic formulation which provides superior control at low rates compared to other leading products
- Provides the broadest spectrum of control within the ALS inhibitor class of chemistry
- Labeled for use on a wide variety of warm season turfgrass with a low-odor formulation that's excellent for commercial and public applications
- Outstanding over-seeded Bermudagrass transition and Zoysiagrass maintenance with superior cost effective performance
- 25% more broadleaf weed control

Long-lasting post-emergent control of 35 tough-to-control grasses and broadleaf weeds, including:

Grasses:

POA annua (Annual Bluegrass)

POA trivalis

Ryegrass

Bentgrass

Broadleaf weeds:

Clovers

Dandelion

Henbit

Chickweed

Wild Onion & Wild Garlic

Spurge

Formulation	A non-phenoxy post-emergent wettable granule
Application Sites	Golf Courses, Sod Farms, Professionally Managed College and Professional Sports Fields, Industrial and Commercial Lawns and other similar non-residential areas
Packaging	6 x 1.5 oz convenient packaging
Application Rates	See label for specific uses and rates
Mode of Action	Inhibits acetolactate synthase, an enzyme that is vital to the synthesis of amino acids in plants, thereby disrupting biosynthesis of the branch-chain amino acids
Signal Word	Caution
