TOTAL

NEMATICIDE/INSECTICIDE

Quali-Pro Total is an emulsifiable concentrate containing 0.15 lbs abamectin/gallon that controls turf-parasitic nematodes and bermudagrass mites on golf course greens, tees and fairways.

Total is compatible with Quali-Pro's Propiconazole 14.3, Strobe 2L, Strobe 50WG and Mefenoxam 2 AQ fungicides. Mixing Total with a fungicide can improve root quality and result in a healthier, more tolerant plant.

QUALI-PRO

Total Features

- Controls the most problematic nematode species on contact including sting, root-knot and lance.
- Powered by the proven active ingredient abamectin, Total is an emulsifiable concentrate formulation designed to move quickly into the soil to where parasitic nematodes are found for prompt, comprehensive control at the source.
- Helps shield roots from nematode damage and drought, which results in more durable, stress-tolerant turf that can recuperate more quickly from stresses like disease and aerification.
- Allows flexible application rates and season-long rotations for effective agronomic program.
- Can be used in rotation with NIMITZ® Pro G for a complete Nematode program.

Total Profile

Active Ingredients	1.9% Abamectin
Effective Against	Turf-parasitic nematodes, bermudagrass mites
Packaging	4 x 1 gallon
Application Rate	See label for specific uses and rates
Signal Word	WARNING
