

Solu-Cal

Works Faster & More Efficiently Than Traditional Pelletized Lime

- Dramatically reduces manpower and transport cost
- Raises Soil pH in weeks rather than months, as compared to pelletized lime
- Only university tested and time proven enhanced pelletized Calcium product on the market
- Solu-Cal products contain

pH:Ca Humic/Fulvic Acid®
technology

**SGN 210
Coarse**

**SGN 70
Micro**

SOLU-CAL

Enhanced High Calcium Lime

38% Calcium

- Micro-fine Calcium Carbonate ground to 45 microns.
- Coarse Grade 210 SGN & Micro Greens Grade 70 SGN.
- Impregnated with 2% PHCA Organic Humic/Fulvic Acid to significantly increase nutrient availability & efficiency while decreasing use rates.
- 38% Calcium for efficient pH adjustment yielding healthier soil.
- Within 8 weeks, full pH correction & Calcium loading is complete.
- 50 lb. bag covers 4,000 sq.ft. to 8,000 sq.ft.; 550 lbs./acre to 60 lbs./acre.
- Safe to use any time of year on all turf and landscapes.
- Apply up to 3 times/year.

SOLU-CAL L

6-0-0 8% Ca Liquid

Calcium Complex with 6.0% PHCA

Application Rate

2.5 gal. to 10 gal. per acre

Improves soil structure, stimulates root and leaf development, regulates soil pH, strengthen cell walls, promote better germination and stand development.

- Clear brown liquid with no grit or sediment as found in liquid lime.
- Adjusts pH more efficiently than liquid lime.
- Will significantly increase stand density & seedling vigor.
- Use in hydroseeders or spray program.
- Contains PHCA Organic Humic/Fulvic Acid to increase nutrient availability and stimulate roots.
- Contains 6.0% PHCA Organic Humic/Fulvic Acid as compared to Nutri-Cal*.

* Nutri-Cal is a registered trademark of CSI Chemical Corporation.

SOLU-CAL products utilize cutting edge

pH!Ca Humic/Fulvic Acid®
Technology

- Helps plant solubilize and actually extract nutrients from the soil while increasing translocation of nutrients in the plant
- PHCA is extremely effective when impregnated onto a Calcium source. When applied, it works immediately aiding the plant in solubilizing the applied Calcium and the accumulated Calcium (including P., K., Fe., Mg. and Mn.) in the soil from previous applications.
- PHCA shows consistent performance in increasing root development, increasing plant health, vigor and nutrient translocation.
