

# Ca Plus™

Sports turf managers and golf course superintendents have long understood the importance of calcium for plant nutrition with the standard treatment often being gypsum, lime or calcium nitrate. While relatively inexpensive, none of these solutions are readily plant available with the vast majority of application lost in soil tie-up.

Ca Plus™ is made up of the necessary nutrients required for healthy, robust turf growth. Powered by Catalyst Technology™, Ca Plus increases calcium efficiency in turf with nano-sized nutrients by preventing soil tie-up with other nutrients in the soil.

## Benefits

- Enhances overall turf quality
- Strengthens plant cellular structure
- Increases plant metabolism of nutrients
- Increases calcium efficiency in turf
- Clean, easy handling solution
- Will not corrode application equipment

## Guaranteed Analysis 5-0-0

Nitrogen (N)..... 5.00%  
 Calcium (C)..... 13.00%

Derived from: Calcium Nitrate, Calcium Ammonium Nitrate, Fermented Sugar Alcohol, Starch, Carbohydrates, Sorbitol.

## Application Rates

	/100m2	/hectare
Foliar Application	47ml – 93.5ml	4.7L – 9.35L
Soil Spray/ Drench	47ml – 93.5ml	4.7L – 9.35L
