

Macro Micro™

There are 17 elements that are essential for plant growth, including nitrogen, phosphorus and potassium that the plant needs in larger quantities.

Some of those nutrients are needed in small quantities, and are referred to as micronutrients. This does not diminish their importance since zinc, manganese, iron and magnesium are critical for robust growth and color.

The right balance of micronutrients provided in a reacted form and ready for plant uptake is paramount. Macro Micro is the answer.

Application Rates

	/100m ²	/hectare
Foliar Application	23.5ml – 47ml	2.35L – 4.7L
Soil Spray/ Drench	23.5ml – 47ml	2.35L – 4.7L

To correct severe micro-nutrient deficiencies apply at a rate of 93.5ml – 140ml / 100m²

Benefits

- The perfect proportion of four key micronutrients:
 - * Manganese
 - * Iron
 - * Zinc
 - * Magnesium
- Contains 2% Nitrogen
- Complexed and chelated minerals resist soil tie-up
- Amino acids complexing provides additional plant growth benefits
- Enhances turf quality and color
- Clean, easy handling solution
- Will not corrode application equipment

Guaranteed Analysis 2-0-0

Total Nitrogen (N).....	2.00%
Available Phosphorus (P ₂ O ₅).....	0.00%
Soluble Potassium (K ₂ O).....	0.00%
Magnesium (Mg).....	2.00%
Iron (Fe).....	0.80%
Manganese (Mn).....	1.00%
Zinc (Zn).....	0.25%

Derived from: Magnesium Nitrate, Ferrous Sulfate, Manganese Sulfate and Zinc Sulfate.
