

Mega Cal™

Golf course superintendents and sports turf managers have long understood the importance of calcium for plant nutrition, with the standard treatment often being gypsum, lime or calcium nitrate. While relatively inexpensive, none of these solutions are readily plant available, with a vast percentage of application lost in soil tie-up.

Mega Cal contains more than 70 essential nutrients that are plant-available, helping build stronger plants and enhanced soil conditions for optimum uptake.

Highly soluble, Mega Cal provides the industry's most cost-effective solution for efficient calcium nutrition.

Benefits

- Enhances overall turf quality
- Ultra-low input rates
- Strengthens plant cellular structure
- Enhances soil structure, creating more efficient pore spaces for nutrient uptake
- Enhances plant metabolism
- Safe to mix with all Amp Agronomy products
- Clean, easy handling solution
- Will not corrode application equipment
- Low impurities

Guaranteed Analysis

Calcium (Ca)..... 20.00%

Derived from: Calcium Carbonate

Application Rates

	/100m2	/hectare
Foliar Application	23.5ml – 70ml	2.35L – 7L
Soil Spray/ Drench	23.5ml – 70ml	2.35L – 7L

Do not mix with Phosphates.
Rinse equipment after use.
