

Root Driver™

Root Driver protects the phosphorus with carbon complexing, keeping the phosphorus free from soil tie-up and available to your plants all season.

Overwhelming research proves that plants require an available supply of phosphorus in the beginning stages of life to reach their growth potential.

Inadequately protected phosphorus is wasted, forming solids in the soil and becoming unavailable to turf as it reacts with calcium, aluminum, iron and other ions in the soil. This leads to nutrient deficiency, causing a lack of full turf growth.

Root Driver protects the phosphorus, giving your turf the nutrients it needs, when it needs it.

Benefits

- Highest availability phosphorus fertilizer
- Supplies available nutrients to your turf
- Promotes quick, uniform root growth
- Seed safe at recommended rates
- Clean, easy handling solution
- Will not corrode application equipment
- Low impurities
- Low salt

Application Rates

	/100m ²	/hectare
Foliar Application	47ml – 93.5ml	4.7L – 9.35L
Controlled Irrigation	47ml – 93.5ml	4.7L – 9.35L
Soil Spray/ Drench	47ml – 140ml	4.7L – 14L

Root Dip = 2.85L in 38L of water.

Root Drench = 0.5L in 38L of water.

Guaranteed Analysis 0-8-5

Total Nitrogen (N).....	0.00%
Available Phosphorus (P ₂ O ₅).....	8.00%
Soluble Potassium (K ₂ O).....	5.00%

Derived from: Protein Hydrolysate and Monopotassium Phosphate.
