

Technical Data Sheet

## Fulvic 6020

**GENERAL DESCRIPTION:** Fulvic 6020 contains fulvic acids derived from a high-quality ore source to help improve fertilizer efficiency.

### Physical/Chemical Properties

- |                               |                          |
|-------------------------------|--------------------------|
| • <b>GUARANTEED ANALYSIS:</b> | <b>0.6% Fulvic acids</b> |
| • <b>pH:</b>                  | <b>2.8 – 4.2</b>         |
| • <b>Relative Density:</b>    | <b>1.000-1.008 g/ml</b>  |
| • <b>Appearance:</b>          | <b>Brown liquid</b>      |

Fulvic 6020 can be applied to all crops including vegetable crops, row crops, field crops, feed crops, trees, vines, ornamental, lawns, gardens and landscaping.

- Fulvic 6020 is compatible with most liquid and dry fertilizers. Always perform a jar test if unsure.
- **Application Techniques:**
  - Alone or in combination with liquid soil applied fertilizers at a rate 0.25 – 0.50 liters/ha.
  - Alone or in combination with liquid foliar applied fertilizers at a rate 0.50 liters/ha.
  - Applied to dry fertilizers at a rate of 1 liter/metric ton of fertilizer.
  - Injected into micro irrigation systems at a rate 0.25 – 0.50 liters/ha.
  - Apply to high traffic/shaded/ poor growth lawn areas 2-4 times/year

### Packaging

- Fulvic 6020 is available in bulk, 10 and 20-liter carboys, 200-liter drums and 1000-liter totes.

### Storage

- Fulvic 6020 storage conditions should not allow air or water to be introduced into the contents of the container. Do not store near heat or open flame. Keep out of reach of children.
