

AC-Pro a unique, patented plant extract product that is applied to Aquaculture systems.

SludgeBuster is a patented plant fibre product applied in combination with AC-Pro and assists with the remediation of water body substrates and reduces excrete, feed residue and sludge accumulation.

AC-Pro & SludgeBuster has a very simplistic application method. It requires no system or capital lay out apart from the product itself..

Treatment successfully Achieves

- Ammonia Reduction**
- Increased Dissolved Oxygen availability**
- Phosphate Reduction**
- Phosphorous Reduction**
- Nitrates Reduction**
- Increased stocking capacity by 100%+**
- Reduction in fish fatalities**
- Improvement of Fish growth**
- Improvement of Fish health and immune systems**
- Reduction in risk of disease**
- Reduction of water consumption**
- Reduces energy for external aeration**
- Reduces environmental impact**
