

&

OxyCure is a unique, patented plant extract product that is applied for the remediation of water bodies and effluents.

SludgeBuster is a patented plant fibre product applied in combination with OxyCure and assists with the remediation of water body substrates.

Treatment successfully reduces

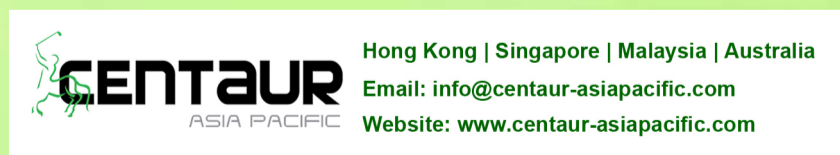

Phosphates	COD	Iron (Fe)
Phosphorus	BOD	Copper (Cu)
Nitrate	TDS (limited)	Manganese (Mn)
Ammonia	TSS	Zinc (Zn)
Anaerobic conditions	FOG	Aluminium (Al)
		Arsenic (As)

Common conditions treated

Eutrophication	Foaming and scum
Algae Blooms	Sludge accumulation
Blue-green algae (Cyanobacteria)	Toxins
Rapid aquatic plant expansion	Odour
Pathogens	Low Dissolved oxygen

Industrial Applications

Lakes, Rivers, Canals and water bodies
 Sewer Plants and treated sewer effluents
 Waste water treatment plants
 Grey water and Black water treatments
 Process water treatments and recycling
 Mining
 Industrial Effluents
 Agricultural water
 Construction water and effluents
