60% Methydure® w/ Fe & Mg + Micros

Professional turf fertilizer for tees and Fairways.
Mini Fairway grade (SGN 145)

Product Features

- 60% of the nitrogen is derived from Methydure® methylene urea.
- Fertilizer providing nitrogen and potassium in a balanced 1:1 ratio to promote healthy, stress-resistant turf.
- High rate of potassium. All the potassium is in the safer sulphate form.
- Contains iron and manganese in the sucrate form.

Turf Benefits

- Methydure® slow release nitrogen is a trusted technology that has a gradual, consistent release and longevity that allows for the effective feeding of turfgrass with fewer applications for up to 12 to 16 weeks.
- Designed for use on tees and closely mowed fairways. Mini-sized particle provides excellent distribution at lower application rates.
- Provides a high rate of potassium for improved drought tolerance, greater disease resistance and improved wear tolerance.
- Magnesium and sulphur help promote good turf colour and vigour. • The role of calcium is to promote cell growth and strengthen cell walls. Calcium makes the plant more tolerant of environmental stresses.
- Iron provides deep green colour without excessive top growth. Micronutrients sucrate technology increases nutrient availability and uptake throughout the growing season while minimizing mower pick-up with the revolutionary dispersing granule technology.

Directions For Use

- Read the entire label before use.
- Apply only as directed during the growing season.
- Apply only to dry foliage.
- Irrigating after application will accelerate initial green-up and will aid in the downward movement of granules into the turf canopy.
- Apply after mowing to prevent particle pick-up by mowing equipment. To further reduce particle pick-up do not collect clippings for one mowing after application.
- Nutrite encourages responsible use of our products. Help do your part in protecting our rivers and lakes by following label directives and cleaning driveways and walkways after application. Do not apply near water storm drains or drainage ditches, if heavy rain is expected or frozen ground.
