

THE ULTIMATE SLIDING SURFACE

A new premier topdressing solution from Turface Athletics!

Turface SlideMaster™ is specially formulated with consistent sub-angular particles that provide the ultimate sliding surface for skinned infields! The particles let water pass through to the infield skin, helping improve water management especially in hot or dry weather.

Turface SlideMaster™ is an expanded shale that can be used as a stand-alone topdressing or can be combined with industry-leading Turface calcined clays to allow you to better manage playing conditions and surface moisture.

Take the next step in your field management routine by adding Turface SlideMaster™ to your lineup

NEW! TURFACE SLIDEMASTER™

AN ALL-AROUND PERFORMER

Researched, developed and tested in the lab and on the field, SlideMaster™ is the latest innovation by Turface® Athletics to meet the demands of today's groundskeepers and coaches.

Natural Red Color: Big Style, Zero Stains

- All-natural color stands out but won't stain uniforms
- Blends well with popular Turface Pro League Heritage Red® and Turface Pro League Champion Brown®
- Generates excellent ball visibility and a sharp, professional look

Superior Particles

- Cleanest, most uniform particle screening of any vitrified clay or shale product – consistent with the sizing of Turface's industry leading Pro League® conditioners
- Sub-angular particles create the ultimate sliding surface with less abrasion
- An extremely durable topdressing that helps lower your upkeep costs

Improves Water Management in Dry Conditions

- Particle design allows water to quickly penetrate to the infield skin for deeper saturation
- Can be combined with Turface calcined clay for optimum moisture management, especially in summer months

Easier Field Prep

- Particles flow easily through drags and screens
- Spreads uniformly, with minimal fines or dust in the bag
- Creates a smooth, professional finished surface

Moisture Management

Turface's calcined clay conditioners provide an unrivaled level of absorption to manage moisture and prevent rainouts in inclement conditions. Turface SlideMaster™ works in concert with Turface calcined infield conditioners to allow water to move through the topdressing layer more quickly, saturating the infield mix when conditions are hot and dry.
