

S.W.A.T.TM

Soil & Water Acid Treatment

CURATIVE

**KEEP OUT OF REACH
OF CHILDREN
DANGER**

**CAUSES SEVERE SKIN BURNS AND EYE DAMAGE.
MAY CAUSE RESPIRATORY IRRITATION.**

PRECAUTIONARY STATEMENTS: Do not breathe fumes, mist, vapors, or spray. Wash hands, forearms and face thoroughly after handling. Use only outdoors or in a well-ventilated area. Immediately call a poison center / doctor. Specific treatment (see supplemental first aid instruction on this label).

Personal Protective Equipment: Wear protective gloves / protective clothing / eye protection / face protection. Wash contaminated clothing before reuse.

FIRST AID:

If Swallowed: Rinse mouth. Do NOT induce vomiting.

If On Skin (or hair): Take off immediately all contaminated clothing. Rinse skin with water / shower.

If Inhaled: Remove person to fresh air and keep comfortable for breathing.

If In Eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

STORAGE AND DISPOSAL:

Storage: Store in a well-ventilated place. Keep container tightly closed. Store locked up.

Disposal: Dispose of contents / container in accordance with local / regional / national regulations.

Net Contents: 2½ Gallons (9.46 L)

S.W.A.T.™ Curative

334052.5G GHSver18220

Salt Remediation Solution for use on Turf and Horticulture Soils

GUARANTEED ANALYSIS:

CONTAINS NON-PLANT FOOD INGREDIENTS:

| | |
|--------------------------------|-------|
| Hydrochloric Acid..... | 30.0% |
| Quaternary Organic Soaps..... | 5.0% |
| Beslyic Acid..... | 1.0% |
| Inert Ingredients (water)..... | 64.0% |

Weight Per Gallon: 9.71 lbs. / gallon @ 68°F

APPLICATIONS:

For use in water to re-dissolve carbonate and oxide based scales, chemically converting them to stable dissolved ions. Dissolved ions are more suitable for plant uptake and nutrition. The nutrient conversion and other chemical reactions including the release of carbon dioxide, aid in the plants growth. Regular use of S.W.A.T.™ Curative will aid in reducing bicarbonate and sodium levels in the soil.

DIRECTIONS FOR USE:

General Use:

Gradually introduce with water maintaining the same pH values as the current treated water system is accustomed to. Add sparingly for re-solubilization (reducing 0.1 pH unit ea. week).

Irrigation Injection Applications:

Inject into the mainline irrigation or add to wet well in such a manner that 2-4 quarts of S.W.A.T.™ Curative is applied per acre per month. Use higher rates for soils containing higher levels of carbonate or oxide based aggregates. Use lower rates as carbonate and oxide based aggregates are decreased over time.

DISCLAIMER OF WARRANTIES:

J.R. Simplot Company warrants that the composition of this product conforms to the description and is reasonably fit for the purpose as stated on the label only when used in accordance with label directions under normal conditions of use. This warranty is expressly in lieu of all other warranties and representations expressed, implied, or statutory, including warranties of merchantability and fitness for a particular use. Timing, rate and method of application, weather and crop conditions, and mixtures not specifically recommended on this label or an accompanying written recommendation, are beyond the control of the seller. Buyer assumes all risks of use, storage and handling of this material not in strict accordance with directions given herewith. Buyer further agrees in the event of damages resulting from, but not limited to, weather or soil conditions, presence of other materials, or failure to follow label directions will be assumed by the Buyer or User; and to accept a replacement of the product or a refund of the purchase price of the product, at buyer's option, as full discharge of seller's liability. No one is authorized to make any other warranty, guarantee or directions concerning this product, and no such warranties, guarantees or directions shall be valid or binding upon seller.

Spray Applications:

Apply S.W.A.T.™ Curative at 0.75 – 1.5 oz per 1,000 ft² (32 oz – 64 oz /acre) in a minimum of 2 gallons of water / 1,000 ft² (88 gal / acre). Apply S.W.A.T.™ Curative once per month or as needed throughout the growing season. Irrigate after each spray application to remove S.W.A.T.™ Curative from leaf surfaces.

Application Precautions:

Not for use as a Potable Water Additive. For off-line use only. Upon completion of use on potable water systems, remove product and adequately flush the system until the water is in compliance with local, state and federal guidelines.

Warning: Do not over apply. When applied, maintain the same pH values. Gradually increase your control set point toward more basic as alkalinity demand values decrease. Excessive treatment volumes can result in severe nozzle plugging.

Compatibility: Do not combine S.W.A.T.™ Curative in the spray tank with pesticides or fertilizer unless prior use has shown the combinations to be physically compatible, effective and non-injurious under local conditions.
