

IMANTS

Penetrometer

The hand-operated Imants professional compaction meter is a quick, easy and reliable method of measuring compaction levels in the soil / root zone. Understanding the degree of compaction and how it can prevent roots from accessing oxygen allows swift action to relieve compaction and prevent ongoing issues, with 20 bar pressure (285 psi) widely considered the problem range.

Campey supply market leading, innovative turf care machinery worldwide, we're continually researching new techniques and refining existing practices to help turf care professionals achieve perfection.
