VREDO

Single Compact

The Vredo Single Compact Series is an accurate and efficient range of disc seeders designed for overseeding golf greens and tees, sports pitches and other amenity grass. Seed is placed in a V-shaped slit at a pre-set depth of between 5mm and 25mm deep, directly in contact with the soil for maximum germination rate. The slits are then closed by a compaction roller and a level surface re-established. There are 4 different widths available to suit tractor overlap, all 3-point mounted behind compact tractors.

Campey supply market leading, innovative turf care machinery worldwide, we're continually researching new techniques and refining existing practices to help turf care professionals achieve perfection.
