MEANGREEN™
ELECTRIC MOWERS

CENTAUR
ASIA PACIFIC

THE WORLD'S MOST PRODUCTIVE ELECTRIC ZERO TURN

The EVO is the industry's largest electric zero-turn. With up to 8 hours of continuous mowing time thanks to its 35-kWh battery, a 74" mulching rear discharge deck, 20-degree slope capability, and performance comparable to a large diesel mower, the EVO is ready for the biggest jobs and longest days.

- All Day Runtime, up to 8 hours of continuous mowing
- 74" 5-blade innovative Vortex mulching rear discharge deck
- Industry-exclusive lightweight aluminium chassis and deck for ultra-efficient power usage
- Patented blade monitoring system for optimal cut quality and efficiency
- Patented low battery location for industry-leading hillside stability and precision handling
- Patented Heavy-duty Impulse Drive System™ (IDS) provides industry-leading performance and reliability

Operational Savings vs. Gas Mower	
Per Hour	\$12 – \$15
Annual Savings	\$12,480 – \$15,600
5-Year Savings	\$62K – \$78K

SMART FEATURES THAT MATTER

ALUMINIUM CHASSIS AND DECK

Designed with all-day runtime in mind, Mean Green is the only electric commercial mower to offer an aluminium chassis and deck. At the same strength as steel, aluminium is about 45% lighter, providing extra power efficiency that turns into about an additional hour of runtime.

INTERACTIVE TOUCH SCREEN DISPLAY

The Interactive Touch Screen Display, with passcode and administrator mode, is function-tested in all environments to ensure long-term reliability. Displays full functionality including battery consumption, state of charge, deck lift system, blade speed control, and drive speed settings. EASY push button START.

BLADE PERFORMANCE MONITORING SYSTEM

Patented Technology that displays the speed and performance of each blade to help the operator maintain optimal quality of cut and mowing efficiency.

IMPULSE DRIVE SYSTEM (IDS)[™]

Our patented fan-cooled Impulse Drive System (IDS)[™] utilizes American-made planetary gear drives from Auburn Gear[®]. Commonly found in construction equipment, these drives are designed to perform all day, every day, all seasons, in some of the worst conditions. Made with heavy-duty cast iron housings and steel cut gears that provide a max load rating of 9,000 lbs/4.5 tons per mower, these drives are designed to last. Controlled by proprietary software, the drives offer precision handling season after season.

SMARTDECK RAPID LIFT SYSTEM

Our patented SmartDeck[™] rapid height deck lift system can be operated with the push of a button or foot pedal. When approaching curbs or obstacles, a simple touch of the electronic foot pedal will completely elevate the deck in seconds!

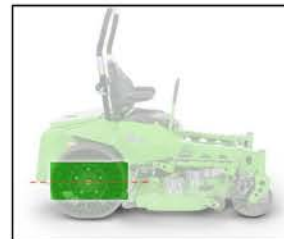

STANDARD FRONT TWEELS

Designed to achieve excellent cutting results and outstanding rider comfort while eliminating downtime caused by flat tyres and unseated beads.

BLAST BLOWER

Our patented front mount 60 dba debris blower with up to 510 CFM lets you easily blow leaves, grass clippings and other debris with the flip of a switch from the operator position. Sold separately.

BATTERY LOCATION

The EVO is stable on slopes up to 20 degrees due to our patented, ultra-low, centralized center of gravity, and engineered battery configuration located only 8 inches above the ground.

EXCEPTIONAL TRAILER UTILIZATION

The Impulse Drive System (IDS)[™] and the “Y” shaped front beam configuration allow for a compact footprint for optimal trailer utilization.

COMFORT SUSPENSION SEAT

Custom, comfortable high-back suspension seat with adjustable padded armrests. They are designed for maximum operator comfort!

STANDARD EQUIPMENT

- Aluminum Chassis and Deck
- 13 MPH Top Speed
- SmartDeck™ Patented Electronic Cut Height Adjustment
- Blade Speed Monitoring System
- Interactive 4" Touch Screen Display
- High Back Suspension Seat
- MICHELIN® Caster TWEEL'S®

OPTIONAL EQUIPMENT

- Front Mount Blast Blower
- MICHELIN® TWEEL'S® Drive Wheels
- LED Light Kit
- LED Amber Flashing Beacon
- USB Charge Port
- Jack Kit
