- Jacobsen Greensking 3, 4, 5, 6 & Jacobsen E322
- Jacobsen GPlex I, II, III & GP 400
- John Deere 2243, 2500, 2500E, & QA5
- Ransome

### Selectable Vibration Settings

Select the amount of vibration you want to release into your greens with the patented Select-A-Vibe™ Dial. The Vibe V™ is the only golf course greens roller equipped with a dial allowing you to adjust your vibration level – giving you complete control of your greens. With 5 settings, you can select the EXACT vibration needed for your application to custom fit your greens:

1. Establishing new greens
2. Regular greens rolling – at least every other day
3. Vibrating-in topdressing
4. Truing greens after aerification
5. Tournament preparation rolling
